EXPERIENCE

IT Support Intern – Federal Ministry of Humanitarian Affairs, DMSD

July 2021 – November 2021

Designed and implemented custom tools and methods to troubleshoot, modify and secure technological systems, for example, the GEEP admin web app.
Provided technical assistance in conducting online and physical meetings, programs, and other investigative and operational activities.

Android Development Projects

July 2019 – Present

I had my first experience with android development at the Andela Learning Community, designing UIs with Java and XML. Then I switched to Flutter and Dart. After three years, I'm now using Kotlin with Jetpack Compose.

Volunteer Tech Support – Various Organizations

August 2015 – Present

Setting up and use of projection software and hardware, management of live broadcasts and recording of programs, video and photo editing, Sound engineering, and hardware repair in the Office of Accountant-General of the Federation, Federal Secretariat Abuja, and RCCG HQ.

SKILLS

- Jetpack Compose for Android Developers
- Kotlin
- Python
- Web2 & Web3
- DevOps with GitHub
- Kubernetes Engine
